TECH TIME
INTERNET SAFETY PARTNER PROJECT

The Internet is a great tool. But it can also be dangerous.

With one partner, design a poster to be posted in the classroom to encourage students to think before they act online.

Include information from the series of videos that we have watched online and in class to illustrate your points.

Your poster must:

1. Be appealing (catches a person's eye)
2. Must have a creative title
3. Include graphics to illustrate your ideas
4. Use correct grammar, spelling, etc.
5. All information must be relative to internet safety.
6. Use fonts, colors, images, etc. to make the "best" design possible.

Go to your Google Docs and open a new Drawing to begin. Save the document in Drive as "Internet Safety Poster"

The rubric for the activity is below. When you finish, share the document with me and allow "comments".
